PROFESSIONAL SUMMARY

Flutter & Django Developer with 1+ year shipping production apps. Built a 3-app real-time platform (ZegoCloud RTC + Razorpay) at GobboG Technologies and deployed a full-stack food redistribution web app solo. Seeking junior developer roles in mobile or full-stack development.

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart, SQL

Frameworks: Django, Django REST Framework (DRF), React, Flutter, GetX

Databases: MySQL, SQLite, Firebase Firestore, Hive, Supabase

Tools & Services: Git, GitHub, Firebase, PythonAnywhere, Razorpay API, ZegoCloud RTC

PROFESSIONAL EXPERIENCE

Flutter Developer – GobboG Technologies

Dec 2024 – Present

- Developed and shipped CallFrnd, a 3-app emotional support platform (User, Executive, Admin) with real-time audio/video calling via ZegoCloud RTC engine.
- Integrated Razorpay payment gateway for secure in-app transactions; architected Firestore data models and Cloud Functions for session management and backend automation.
- Managed end-to-end state with GetX across 3 interconnected apps, delivering reactive UI updates and smooth cross-app navigation.

KEY PROJECTS

Surplus Food Donation and Redistribution System – FoodShare | foodrescue.pythonanywhere.com

Django | Python | SQLite | MySQL | Razorpay API | HTML/CSS | Bootstrap | PythonAnywhere

- Built and deployed a full-stack food redistribution web app where restaurants/hotels can list surplus food, users can browse and purchase at reduced prices, and verified NGOs receive food for free.
- Implemented role-based access control (Donor, User, NGO, Admin) with a custom permission decorator, UUID-based donation URLs, and ownership checks to prevent unauthorized edits or deletions.

CallFrnd – Emotional Support App | GobboG Technologies

Flutter | GetX | Firebase (Auth, Firestore, Cloud Functions) | ZegoCloud RTC | Razorpay

- Delivered a cross-platform multi-app platform (User, Executive, Admin) supporting real-time video/audio calling between Web and Android apps, integrated in-app payments, and Firestore-backed session management.

EDUCATION

B.Tech in Computer Science and Engineering – Carmel College of Engineering & Technology

2018 – 2022

Backend Development Program – Luminar Technolab

Jan 2026 – Present

- Worked on Python fundamentals, data structures, functions, and problem-solving exercises.
- Developed small applications and scripts to strengthen backend programming concepts.
- Built Python CLI tools and Django web apps with MySQL in a structured backend curriculum.
